Profile

Senior Technical/Application Support Engineer and Java Backend with over 5 years of experience designing scalable backend systems and supporting critical financial systems. Strong background in technical and application support, SQL scripting, system monitoring, incident management, and vendor escalation, with hands-on exposure to banking systems, transaction flows, and compliance-driven operations. Proven ability to resolve high-priority incidents within SLA, support production systems, analyze transaction data, and document technical processes and working in shift-based and remote operational environments and collaborating across internal teams and external vendors. Recently expanded expertise into AI and Machine Learning for prediction, anomaly detection, and data-driven decision systems.

Technical Skills

- Languages: Java, TypeScript, JavaScript, Python (Pandas, NumPy, Scikit-learn)
- Backend: Spring Boot, NestJS, Node.js
- Frontend: React.js, Tailwind CSS
- DevOps: AWS, Git, Maven, Github Actions
- Containerization & Orchestration: Docker, Docker Compose, Kubernetes
- Monitoring: AWS CloudWatch, Prometheus, Grafana, Loki
- Async Messaging: Apache Kafka, RabbitMQ
- Testing & Debugging: JUnit5, Mockito, Testcontainers, Selenium, Postman
- Microservices: Spring Cloud, Spring Boot, API Gateway
- Caching: Redis
- Database: PostgreSQL, MySQL
- Product Skills: Product roadmaps, Technical Support, Customer Interactions, Agile methodologies, Technical Documentation, SLA and Control Compliance, Incident Management and RCA
- Machine Learning: Logistic Regression, Random Forest, Neural Networks

Experience

IT Consortium | May 2024 - Present

Technical/ Application Support Engineer (Team Lead)

- Provide Level 2 application and systems support for 5+ financial and transaction-processing applications, maintaining 95%+ uptime and improving transaction success rates.
- Diagnose and resolve transaction failures, interface issues, and system exceptions, escalating to internal senior engineers or external vendors when required.
- Perform SQL-based investigations on databases to analyze transaction anomalies, reconcile records, and support operational reporting and automating tasks with scripts to improve productivity.
- Monitor systems using AWS CloudWatch proactively identifying system performance issues, resolving transaction failures.
- Lead incident response and root cause analysis (RCA) for high-severity issues, consistently resolving incidents within defined SLA targets.
- Handle 300+ support tickets monthly via Jira and Teamwork Desk, ensuring accurate documentation and SLA compliance.
- Support change management, UAT validation, and production releases, ensuring minimal disruption to live systems.
- Maintain technical and API documentation (using Postman and Swagger), operational reports, and knowledge base articles to support continuity and team productivity.
- Coordinate with external vendors and internal development teams on system enhancements, configuration changes, and defect resolution.

AO Holdings Limited | September 2021 – April 2024

Business Application Software Developer

- Supported the development and maintenance of enterprise-grade backend systems using Java Spring Boot within a microservices architecture.
- Built and maintained APIs handling high-volume transactional data, improving system reliability and performance.
- Collaborated on system integrations and interfaces, identifying and resolving data flow and consistency issues.
- Wrote and optimized SQL queries for data extraction, validation, and reporting across PostgreSQL and MySQL databases.
- Implemented logging, monitoring, and observability using Prometheus, Grafana, Loki, and Tempo to support proactive issue detection.
- Participated in UAT support, production deployments, and post-deployment monitoring, ensuring stable releases.
- Produced technical documentation and participated in code reviews to ensure system integrity and compliance with internal standards.
- Maintained version control with Git and GitHub, promoting codebase integrity and participated in agile team sprints and code reviews.

EddieVolt | 2023 - 2024

Customer Service Agent (Remote) - Part time

- Delivered exceptional customer support through phone, chat, and email, ensuring prompt resolution of inquiries and issues also ensuring high CSAT scores
- Assisted customers with order tracking, returns, product information, and account management using CRM systems and improving customer satisfaction rates.
- Resolved high volume of customer issues related to orders, accounts, and escalations while maintaining a professional tone and identified customer needs and provided solutions contributing to customer retention and loyalty.
- Consistently met or exceeded KPIs on resolution time, satisfaction, and engagement.

Project

Library Management API | Java, Spring Boot, React JS

- Developed RESTful API using Spring Boot, JPA/Hibernate, PostgreSQL following TDD principles
- Implemented user authentication with Spring Security, JWT, achieving role-based access control
- Created automated test suite with JUnit and Mockito.
- Built CI/CD pipeline using Jenkins for automated testing and deployment.
- Integrated Redis caching to optimize API response times for high-traffic endpoints
- Documented API endpoints using Swagger for team collaboration

Education

University of Ghana, Legon	Bachelor of Science, Computer Engineering	2017 – 2021
University of Ghana, Legon	Master of Science, Computer Science	2025 – Present

Professional Certifications

- AWS Certified Cloud Practitioner - [Badge](#)
- AWS Certified AI Practitioner - [Badge](#)
- AWS Certified Solutions Architect - [Badge](#)
